

Cost Effective 10G Fibre Network + Storage Solution

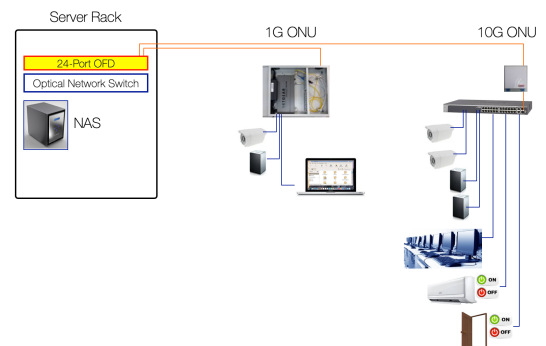

In 2015, the Government launched WiFi 100 / 900 campaign. Since then, nearly all schools in Hong Kong has installed with Wi-Fi network to support eLearning and BYOD.

Nevertheless, as most education system and security system are network connected, most schools have experienced network speed limitation due to the Wi-Fi industrial standards used (802.11n / ac) as well as aging I.T. network.

Histechs' 10G Fibre Network + Storage Solution is a very cost effective fibre optical network with 10G storage solution which helps all kinds of education institution to achieve their education goals and budget. Simply install F-T-T-R solution in a few critical rooms, the network efficiency can be greatly enhanced.

Features:

- Proprietary Quick-Fibre-Deployment technology
- Point-to-Point (P2P) Network Architecture
- Optimized WDM for full-duplex signal flow
- Add-On Plug-and-Play Applications
 - Video Conferencing System
 - High speed Network Storage
 - Centralized Door-Lock & Energy Management
 - IP-PA System
