

Histechs® 4G Body Camera

Recording officers' activities and collect video evidence in action is no longer enough, that's why Histechs® 4G body camera is welcome by many law enforcement units around the world. Histechs® 4G body camera has built-in encryption algorithm for local recordings, as well as Instant video uploading via 3G/4G for recording backup to prevent video lost and central command control.

Features:

- Live-stream video and audio through 3G, 4G or Wi-Fi.
- Live tracking of the device through built-in GPS in the device. The GPS data will also be recorded into the record file with audio and video, location information can be retrieved in the record file.
- Dual 2600mAh lithium battery for power supply. Continuous recording up to 10 hours.
- Built-in 16G storage space. (32G~128G optional storage space)
- Built-in 5 million pixel cameras, support recording at 1512P, 1440P, 1296P or 1080P resolution, support taking picture with 64M, 16M and 4M.
- Support IR. Support recording at night.
- Record file name have information on date, time, record type, which make it easier for searching.
- User can explore, search and playback the files on the device.
- Support panic button. The panic button alarm can be sent to control center through 3G/4G.
- Support encrypted video recording.
- Support H.264 and H.265 video compression.
- OSD can display a wide range of information including device ID, user ID, date and time, battery usage, charging status, system time and memory space.
- Colored light indicator for power on, recording video or audio.
- Report event alarm, including alarm for battery running low, insufficient memory space alarm etc.
- Log events that include power on/off, recording video, recording audio, taking pictures, GPS status fixed, 3G/4G connection, and Wi-Fi connection.

Specifications

Sensor	OS05A10 Image Sensor; 1/2.7 CMOS Sensor	Wireless	Optional 3G/4G (GPRS/WCDMA/EVDO/TD-SCDMA/FDD-LTE/TDD-LTE/700MHz), Optional Wi-Fi, Bluetooth
Lens's angle	>120°	GPS	BDS/GPS to record location and speed
Video input	1x digital built-in Camera, can connect to external camera via USB port	Language	English
Video output	H.264 / H.265 AVI	OSD	Display and record time, license ID, officer ID, location, speed
Recording resolution	PCM	Record encryption	Support Record encryption, encrypted video can be played in special player
Frame rate	30 fps@ (1080P / 1440P) / 25 fps@ 1512P	Log	Record power on/off, setting change, start record, alarm etc.
Video Compression	H.264 / H.265	Player	Player software, play multiple cameras together, can also play the encrypted file
Live video resolution	720P / 1080P / 1440P / 1512P	Cloud Platform	Used for 4G/3G model only, support live view/live tracking/historical track
Photograph	4M, 16M, 64M	Working Temperature	-30 to 60°C
Snap	Support snapping during recording(the photo resolution base in recording resolution)	Working Humidity	40% to 80%
Audio input	1x MIC input, support intercom connection with USB	Time Stamp	Synchronize with GPS, internet, PC
Audio Compression	PCM	Dual bit stream	Two different bit stream for recording and live streaming via 4G/3G
Audio output	Built-in speaker & 2.5mm audio port	Battery charger	2A fast charging
Storage Capacity	Built in 16GB TF card (available for 32~128GB)	Battery capacity	2600mAh battery x2; 10-hr continuous recording; 10-hr continuous 4G device pictures upload
Storage Level	Visual indicator and audible alarm	Waterproof	IP68
Light source	Flash light, laser, IR	Charging Time	Fully charge in 4 hours
Talk back	Support two way radio between different devices(only for 4G/3G device)	Password Protect	Need password login to enter Setting or Playback in safe mode
Talk back in platform	Support two way radio between device and platform(only for 4G/3G device)	Dimension	83.2mm x 54.8mm x 29.8mm
One-touch SOS	Support SOS button input and the alarm can be show in platform	Weight	About 145g
